Claim Objections

Claims 2, 4, 14, 20 and 23 are objected to because of the following informalities:

Claim 2, line 2, "a" should be ---the--- or ---said---.

Claims 4, 14, 20 and 23, lines 1-2, "the cable protector connector" should be plural.

Claims 4, 14, 20 and 23, line 4, "a" should be ---the--- or ---said---.

Claims 4, 14, 20 and 23, line 4, "cable protector" should be plural.

Appropriate correction is required.

Allowable Subject Matter

Claims 1, 3, 5-13, 15-19, 21, 22, 24 and 25 are allowed.

Claims 2, 4, 14, 20 and 23 would be allowable if rewritten to overcome the objection(s) set forth in this Office action.

The following is an examiner's statement of reasons for allowance:

The primary reason for the indication of the allowability of claims 1, 3 and 5-12 is the inclusion therein of the combination of "a central member bridging the void between the side ramps of two cable protectors placed ^d/_h in a parallel, side-by-side relationship with ^{OR 12/1/03} predetermined spacing and having an upper surface extending between the cable protectors" and "cable protector connectors extending from the central member to removably secure the cable protectors to the central member" in combination with the other claim limitations. This combination was neither disclosed nor taught by the cited prior art, alone or in combination.

The primary reason for the indication of the allowability of claims 13 and 15-17 is the inclusion therein of the combination of "a central member bridging the void between the side ramps of two cable protectors placed in a parallel, side-by-side relationship with predetermined spacing" and said central member having "(b) tapered lateral edges complementing the side ramps of the cable protectors" in combination with the other claim limitations. This combination was neither disclosed nor taught by the cited prior art, alone or in combination.

The primary reason for the indication of the allowability of claims 18, 19 and 21 is the inclusion therein of the combination of "a central member bridging the void between the side ramps of two cable protectors placed in a parallel, side-by-side relationship with predetermined spacing" and said central member having "(b) at least one track extending along the length of the bottom of the central member to hold cables" in combination with the other claim limitations. This combination was neither disclosed nor taught by the cited prior art, alone or in combination.

The primary reason for the indication of the allowability of claims 22, 24 and 25 is the inclusion therein of the combination of "a central member bridging the void between the side ramps of two cable protectors placed in a parallel, side-by-side relationship with predetermined spacing" and a base member having "(c) a central member connector to removably secure the base member to the recess in the central member, said central member connector having at least one track extending along the length of the central member to hold cables" in combination with the other claim limitations. This

combination was neither disclosed nor taught by the cited prior art, alone or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Zeinstra et al. (US 6,067,681) disclose a hose bridge. Ziaylek et al. (Des. 370,717) disclose a hose bridging apparatus. Spangler (US 585,540) discloses a hose bridge.

This application is in condition for allowance except for the following formal matters:

Please see above noted objections.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
